**The flavours you want,
the quality you need.
Ready for every kitchen**

Discover the BRG'R Burger Range

"Flavor, convenience, and quality in perfect harmony"

Welcome to the world of BRG'R, where we bring together taste and innovation in a range of six unique burger blends. Our collection is designed for ease and quick preparation, perfect for the modern kitchen. At BRG'R, we believe convenience should never come at the cost of quality. That's why we use only the finest ingredients to craft burgers that impress, every single time.

Whether you choose one of the Pure Beef Burgers, the luxury Blender Burgers, or a sustainable Hybrid option, each product offers the perfect balance between quality and price. With our blends, you'll enjoy premium flavor and texture without compromise – a delicious experience that remains affordable.

Choose BRG'R and discover how convenience and affordable luxury come together in every bite.
Fast, simple, and always top quality.

BLENDED

Developments

At BRG'R, we never stop innovating.

At BRG'R, we never stop innovating. Our Blended range is expanding with new concepts designed to meet the needs of chefs and foodservice professionals looking for premium flavor with ultimate versatility.

We are currently developing new Blended Burgers with:

- 95% beef content - delivering an ultra-rich and indulgent flavor profile.
- 90% beef content - balancing exceptional taste with a slightly lighter composition.

These new recipes will offer even more choice within our Blended range, providing solutions for kitchens that demand luxury, taste, and consistency.

Stay tuned as we continue to push boundaries and raise the standard for premium blended burgers.

"More variety, same trusted BRG'R quality."

Beef mixed with plantbased ingredients

HYBRID

Burger

"Big on flavor, lighter on the planet."

Meet the future of burgers: the Hybrid Brg'r. This innovation combines 70% beef with 30% premium plant-based proteins, without compromising on taste or texture.

Perfect for conscious eaters who refuse to choose between delicious and sustainable.

Why the Hybrid Brg'r?

- Less Beef, full of flavour
- Better for the planet
- appr 25% Lower carbon footprint,
- Perfectly juicy with authentic meat texture
- Ideal for a healthier, more sustainable lifestyle

**Available in

on request

HYBRID

Developments

Our Hybrid Brg'r is redefining what a burger can be – and we're taking it even further.

We are now developing additional Hybrid Burger options to drive even higher CO₂ reduction without compromising taste or texture:

- A new 70/30 burger (70% beef / 30% plant-based proteins) with an optimized plant blend.

Test recipes featuring

- 70% beef / 30% plantbased
- 65% beef / 35% plantbased
- 62% beef / 38% plantbased

both to achieve significant carbon footprint reductions, while maintaining the juicy, meaty experience BRG'R is known for.

By continuously innovating, we ensure that sustainability and flavor go hand-in-hand, offering chefs and conscious consumers the best of both worlds.

"Same taste, even less impact"

HYBRID

Developments

BLENDED

Developments

"Our Hybrid & Blended Burgers deliver the same great taste and juiciness you love, with a healthier profile, a lower carbon footprint, and a more cost-effective solution – the perfect balance between meat and plants for today's conscious consumer."

Benefits of Hybrid & Blended Burgers

- **Less meat, lower CO₂:** Reduced environmental footprint without compromising on taste.
- **Healthier profile:** Lower in fat and calories, higher in fiber and plant proteins.
- **Full flavor & juiciness:** Perfect bite thanks to innovative ingredients like f.e. TexaPure or Meatless.
- **Flexitarian & future-proof:** Ideal for consumers looking to reduce meat consumption.
- **Versatile use:** From burgers to minced meat, also suitable for health and school catering.
- **Cost-effective:** Lower cost price due to reduced meat content, attractive for large-scale users.
- **Easy transition:** Same taste and texture as meat, appealing to meat lovers.
